

International Collaboration And Exchange Program

Preparing global leaders for healthcare

Connect with
students from
37 major
universities
across 5
continents

Attend
lectures
from
leading
academics

No
tuition
or fee

Get
international
and
intercultural
experience

Join an
optional 12
months
research
internship at
one of our
partner
universities

Apply for a better and stronger connection to our LMU cohort!

International Collaboration And Exchange Program

What?

The International Collaboration and Exchange Program ("Columbia ICE program") is an international student networking and collaboration program specifically created by students and faculty to promote international competencies in premed, medical, dental, biomedical and healthcare students.

Why?

The goal is to impart skills in leadership and intercultural competencies, so that future leaders can work with each other globally to solve health issues in an international collaborative manner.

Who?

Each year 500-700 students from 37 major partner universities work on small group projects that cover areas of healthcare typically not taught in regular medical curricula (e.g. Public and Global Health, Health ethics and law, International health education and healthcare systems, reflections on the topic of death, etc.). Students are selected based on their interest in future healthcare leadership roles and interest in international research.

Cost?

There is no tuition or fee for any portion of the program but we expect full commitment once accepted.

International Collaboration And Exchange Program

When?

The fall program starts in mid-October and ends by the start of May.

More

Opportunities for continuation of the program and maintaining connections is offered via ICEP regional chapters and via shared interest groups (SIGs).

Contact

More information about the program will be shared via an “information session” meeting organised locally by your school.

More information can also be found on our website:
<https://www.internationalcollaborationexchange.org>

International Collaboration And Exchange Program

ICEP Elements

Faculty lectures

From leading academics across the world

Small group meetings

Deepen your understanding of topics by exchanging viewpoints with your peers from different countries

Social “meet and greet” networking sessions

Connect with your peers and learn about their academic lives and other cultures

Optional travel component

Participate in a 12-month research internship in one of the partner countries while immersed in an academic life abroad.

Another travel opportunity is offered, the Academic Immersion Travel (AIT), a hands-on experience to meet fellow ICEP students, hosted every year by a different university.

Shared Interest Groups (SIGs)

Additional specialised lectures, conferences and discussions for students that want to deepen their international skills surrounding a certain topic

International Collaboration And Exchange Program

Goals of ICEP

01

Improve understanding of cultural competency, including customs, beliefs and stigmas

02

Learn about other healthcare systems

03

Learn about public and global health challenges

04

Appreciate differences in medical ethics and laws

05

Network and form international friendships

06

Learn about international collaboration and teamwork

07

Work across cultural, language and time zone differences

08

Improve leadership skills
